Name Changes as of WebHub v2.081

Overview of Renamed Components

Original	WebHub v2.081
ThtWebApp	TwhApplication Note: many properties were moved to subclasses, e.g. AppRoot is on pWebApp.Static.AppRoot; see whcfg_App.pas When initializing, first set the AppID propery, then refresh, then feel free to reference any of the subclasses.
AppDefaults	Moved to properties on app objects; use AppSettings for custom configuration
TWebActionNoSaveState	TwhWebAction (see webLink.pas)
TWebAction	TwhWebActionExTWebPage TwhPage
TWebCommandLine	TwhConnection
pWebCommandLine	pWebConnection
TWebServer	TwhRequest (mostly; some properties moved to pWebApp.DynURL)
TWebOutput	TwhResponse
TWebInfo	TwhCentralInfo; reference as pWebApp.CentralInfo

WebHub: renamed properties, v2.053 to v2.081

Original	Name in WebHub v2.081	Type	Config file and section hint
Original Name:			
(new)	(pending).IsAuthenticated	... Boolean	
(new)	(pending).ClusterID	... string	Central	HubProcess/ClusterID
(new)	(pending).ModuleIsEnabled	... Boolean	AppConfig	../DataModule[@enabled] or ./Panel[@enabled]
(new)	(pending).ModuleIsPanel	... Boolean	
(new)	(pending).ModuleName	... string	AppConfig	../DataModule[@name] or ./Panel[@name]
(new)	pWebApp.PageErrors	... published	
(new)	pWebApp.ForceCase	... TwhForceCase	AppConfig	Application/DynURLs/ForceCase
(new)	pWebApp.ServerProfileIDSecure	... string	AppConfig	../AppProperties/SecureServerProfileID
(new)	pWebApp.ServerProfileIDStandard	... string	AppConfig	../AppProperties/StandardServerProfileID
(new)	pWebApp.ConnectToHub	... public Boolean	
(new)	pWebApp.CustomConfigFiles	...	AppConfig	CustomConfigFiles section
(new)	pWebApp.SessionID	... published string	
(new)	pWebApp.AppInfo	... TwhAppInfo	
(new)	pWebApp.CentralInfo	... TwhCentralInfo	
(new)	pWebApp.Connection	... TwhConnection	
(new)	pWebApp.InstanceCounter	... TwhAppInstanceCounter	
(new)	pWebApp.Request	... TwhRequest	
(new)	pWebApp.Response	... TwhResponse	
(new)	pWebApp.YesNoString	... string	AppConfig	Application/PageGeneration/YesNoString

WebHub: renamed properties, v2.053 to v2.081

Original	Name in WebHub v2.081	Type		Config file and section hint
Original Name:				
(new)	pWebApp.HttpServerID	... published string	AppConfig	calculated
(new)	pWebApp.RunningAsService	... Boolean	AppConfig	calculated
(new)	pWebApp.ServerProfileID	... published string	AppConfig	
(new)	pWebApp.AdminSessionID	... string	AppConfig	Application/Security/AdminSessionNumber
(new)	pWebApp.AdminSideDoorPageID	...	AppConfig	
(new)	pWebApp.ExceptionPageID	...	AppConfig	
(new)	pWebApp.MenuEnabled	... Boolean	AppConfig	Startup/MenuEnabled
(new)	pWebApp.Modules	... TwhModuleInfoList	AppConfig	Startup/DataModules plus Startup/Panels
(new)	pWebApp.ShutdownCommand	... string	AppConfig	Application/AppProperties/ShutdownCommand
(new)	pWebApp.SimulatedCommandLine	... string	AppConfig	Startup/SimulatedCommandLine
(new)	pWebApp.SplashEnabled	... Boolean	AppConfig	Startup/SplashEnabled
(new)	pWebApp.StartMinimized	... Boolean	AppConfig	Startup/StartMinimized
(new)	pWebApp.TrayIconEnabled	... Boolean	AppConfig	Startup/TrayIconEnabled
(new)	pWebApp.MacroEndMarker	... public string	AppConfig	..PageGeneration/Syntax0100/MacroEndMarker
(new)	pWebApp.AppInfo.AppGroupName	... string	Central	WebHubAppGroups/WebHubAppGroup[@name]

Resources to help with upgrading existing projects

1. FuzRegex search and replace utility at www.fuzregex.com.   Scripts for upgrading * whteko files and Delphi projects are in www.fuzregex.com/download/share area.   Using this tool will save you hours and take care of about 98% of the conversion process for you... Contact techsupport @ href.com for an unlock code.

2. WHZMConverter.exe (wizard) converts INI configuration files to XML format. If your application INI file is more than 5 lines long, use this tool! Customers will find it on ftp.

3. www.href.com/listserv for free support via community

4. email techsupport @ href.com for paid support contract; first two hours free for long-term customers upgrading to latest release

5. www.href.com/pub/relnotes/ always has the release note details for specific builds. Note this is searchable via google, example "pWebApp .site:href.com"
